

Museum Palo Verde

Cercidium-parkinsonia hybrid
Very fast growing hybrid version of the classic Palo Verde. Provides the unique green trunks of the original only it grows faster, is cleaner, blooms better and has no thorns.

Sissoo Tree

Dalbergia sissoo
Closely resembling an Aspen, the Sissoo is perfectly at home in Arizona and thrives in ultra-hot conditions. These trees grow very rapidly after planting.

Chilean Mesquite

Prosopis chilensis (hybrid)
A top-selling desert tree, this is a thornless variety of mesquite that provides a lot of shade and grows very fast. They look great and can be planted just about anywhere.

Vitex

Vites angus-castus
Vitex trees provide a bit of shade and have a fantastic bloom period. Flowers appear as spikes of purple across the entire tree and are known to attract butterflies. The complicated trunk structure is unique to the Vitex.

Willow Acacia

Acacia salicina
Unique silver-blue leaves with a slightly weeping appearance make this tree useful for many landscape styles. Plant anywhere you need a large tree to grow quickly.

Desert Willow

Chilopsis linearis
Desert Willows have been a classic for decades across the Southwest. Greatly resembling a Willow, they show incredible blooms throughout the late summer and into mid-fall.

Shoestring Acacia

Acacia stenophylla
A very unique evergreen desert tree. This extremely fast growing tree provides a tall, year-round weeping effect while using minimal water. These require very little pruning and cleanup.

Palo Brea

Cercidium praecox
This Sonoran native features unique green trunks that twist and turn to form interesting, irregular patterns throughout the tree. Makes a fantastic focal point and provides great shade as well.

Mulga Acacia

Acacia aneura
Native to the arid regions of Australia, this unique, medium size tree is right at home here in the Southwest. Very interesting silver leaves give it the right color for all desert style landscapes.

Sweet Acacia

Acacia smallii
This Sonoran native is well known for its beautiful and aromatic blooms during early spring. It serves as a great shade tree, especially during the hot summer months.

Ironwood

Olneya tesota
The exceptionally hardy Ironwood tree makes an excellent choice for desert style landscapes. Unique trunk patterns, purple blooms, and foliage color make it a great focal point for any landscape.

Acacia Saligna

Acacia Saligna
These Acacias grow a very wide umbrella-shaped canopy that provides filtered shade year round. They are a very fast growing tree with great durability to heat and cold.

Blue Palo Verde

Cercidium floridum
This is the classic Palo Verde that has been growing in the Southwest for centuries. It's very well adapted to the desert and sports green trunks that make it a great show piece in desert style landscapes.

Ocotillo

Fouquieria splendens
Ocotillos are used more as a unique desert-themed accent tree. This tree's looks can't be compared to anything else. Long canes of desert green, blooming fiery red at the tips make it a must for desert style landscapes.

Texas Ebony

Pithecellobium flexicaule
Native to the arid desert, this highly decorative tree produces beautiful cream colored, fragrant flower clusters that bloom in the late Spring and accent the trees twisting branches. A great addition to desert landscapes.
