

Ficus Nitida Columns

This is by far the most popular choice for making an evergreen screen hedge. If you're looking for a hedge to protect your property or block a particular view then plant a row of Ficus Columns and the problem is solved.

Podocarpus

Podocarpus henkelii
If you're looking to bring year-round shade into your landscape, the Podocarpus can fit just about any application you have in mind. These are a great choice for hedges and property screens.

Japanese Privet

Ligustrum japonicum
Japanese Privet provide both year-round shade and big seasonal color requiring very little maintenance. They're very easy to grow.

Oleander Hedge

Nerium oleander
A rare combination of being an evergreen and producing vibrant color makes the Oleander hedge wonderful in many landscapes. It's fantastic for shading in smaller courtyards and patios.

Bottlebrush Hedge

Callistemon spp.
Bottlebrush make for a fantastic year-round colorful hedge, and is named for the brush-shaped flowers that are peppered throughout the foliage. Canopies grow thick and green allowing for maximum shade and privacy.

Japanese Blueberry

Elaeocarpus decipiens
Japanese Blueberry are sought after for the thick, hardy canopies they grow that are highly resistant to the elements, creating a dependable shade, wind break or property screen.

Timber Bamboo

Phyllostachys bambusoides
Timber Bamboo grows dense, very fast and does an outstanding job working as a privacy hedge and easily transforms any basic garden or patio into a lush tropical relaxing setting.

Carolina Cherry Compacta

Prunus caroliniana compacta
Carolina Cherry trees are easy to maintain and work vigorously to provide year-round thick dense green foliage commonly used by landscapers seeking to add additional privacy to a home or residence.

Mastic Hedge

Pistacia lentiscus

Ideal for hedge material, property lines, or security screens, Mastic trees are a great solution to break down neighborhood noise and add privacy to your home with a thick canopy year round.

Italian Cypress

Cupressus sempervirens

Italian Cypress are native to the Mediterranean; grow tall, straight evergreen columns for an exceptionally formal look.
